Copy 7 of 7

14 AUG 1961

MEMORANDUM FOR: Colonel Leo P. Geary
AFCIG-5

SUBJECT : Movement of Article Nr. One

1. In anticipation of delivery of the first article toward the end of this year, Lockheed wishes to apply now for a State of California permit for movement of an oversized load. As you may know, a portion of a California road over which the load will be moved must be widened to permit passage. Lockheed has just learned that the State has appropriated funds to widen the road, but may not do so soon enough to meet our needs until they know that such a requirement exists.

2. Lockheed will apply to the Department of Public Works, State of California, who in turn will seek approval from Mr. Lewis Molinari in The Military Traffic Management Agency, Highway and Rail Traffic Department, Oakland, California, (Telephone: Twin Oaks 3-4100, extension 5119). It is understood that the latter Agency is under the jurisdiction of The Military Traffic Agency, Washington, D. C. When applying, Lockheed will describe the load as "classified Department of Defense equipment" to be moved from Burbank, California, to

3. Lockheed, who has had considerable experience with these Agencies in the past, feels that fewer questions will be asked and probably less attention attracted if some Headquarters USAF (or DOD) authority directs the local Military Agency to approve this application. Lockheed has asked that this intercession on their behalf be undertaken in time to permit their application on 17 August 1961. Your support in this situation is solicited.
